

Being a leader in the Client Satisfaction, working in respect of the Environment, of reduction of energy consumption, of the Security and of the Persons Health

In order to pursue these goals, OMP – Officine Mazzocco Pagnoni s.r.l. dedicates itself to execute a continuous monitoring of its proper external and internal context, in order to individualize, at the right time, every factor that conditions the actual and future services of the organization.

The management sustains, in coherence with the risks and opportunities identified, the continuous evolution of its proper Quality – Security – Environment – Energy Management Integrated System, and promotes a working environment positive and participated, both in its proper internal both towards the clients, suppliers, external parts interested, until each worker can be an active part in respect of the laws, company norms, of the working colleagues, independently by their hierarchic level, and can always be a promoter in the continuous improvement.

The society puts in the center the client satisfaction, without never setting aside the respect of the environment and of the persons, following the policies of the prevention of the pollution, of the injuries and of the professional diseases, further to the respect of all of the conformity obliges applicable. In particular, the company commits itself to pursue these goals through:

- **Quality**
 1. tight collaboration with the client;
 2. continuous enhancement of the persons and of their competence;
 3. continuous investments in the processes and in the innovations;
 4. collaboration and development of the suppliers;
 5. continuous improvement of the Quality Management System.
- **Environment**
 1. environment protection and continuous improvement of the management system, in order to increase the environmental services;
 2. choose and use of methods and of systems of an elevated technological content, in order to reduce to the minimum the use of first matter, of energy and natural resources.
- **Security and Workers Health**
 1. Creation and maintenance of a rational working environment (arrangement, cleanliness, ergonomics);
 2. promotion of communication and the involvement of all OMP employees
 3. choose and use of productive means that respect the essential safety requisites;
 4. programmed maintenance of the productive means;
 5. to awaken on the risks connected to the various functions to all of OMP's collaborators.
- **Energy Management**
 1. a progressive reduction of the use of energy introducing the best techniques available (where possible, plants at a low use and maximum performance);
 2. a monitoring introduction always more widespread of its proper use in order to intervene in an efficient way on eventual wastes.

Furthermore O.M.P. S.r.l. recommends and invites all its suppliers to make a constant commitment in reducing greenhouse gases, improving energy efficiency, increasing the use of green energy, conscious consumption of water, reducing waste and the raw materials used, to the constant commitment to reduce air and water pollution.
